

**Homeland Supergraze High-D**

- 2.0kgs AberGain
- 2.0kgs Kintyre
- 4.0kgs Drumbo
- 3.0kgs AberChoice
- 0.5kgs Pelleted Clover blend

11.50 kgs

**KEY FEATURES:**

- Formulated to deliver a highly digestible sward across the entire grazing season.
- Excellent spring growth enabling farmers to get their animals out to grass early and therefore reducing their winter feed costs.
- Gives a leafy nutritious sward with high intakes of quality forage.

**Contains varieties:**

**AberGain:** highest overall variety for spring growth, total annual yield & digestibility on the IRL

**Kintyre:** extremely high yielding grass variety with excellent palatability.

**Drumbo:** exceptional spring growth and digestibility, second highest in its class.

**AberChoice:** highest total annual yield & digestibility in its class.

**Pelleted Clover blend:** contains a blend of large and medium leaved clovers, very suitable for grazing.

**Homeland Two Cut Silage**

- 2.0kgs Dunluce
- 2.0kgs Seagoe
- 4.0kgs AberMagic
- 3.0kgs Clanrye
- 0.5kgs Pelleted Clover blend

11.50 kgs

**KEY FEATURES:**

- Formulated to deliver longevity and consistent quality.
- First cut silage can be planned by late May or early June. Second cut silage can be planned from mid July onwards.
- Produces rapid regrowth after cutting with a leafy aftermass of highly digestible grass.

**Contains varieties:**

**Dunluce:** No 1 intermediate tetraploid on the PPI list – excellent for graze/silage.

**Seagoe:** exceptional total annual yield and digestibility, second highest in its class.

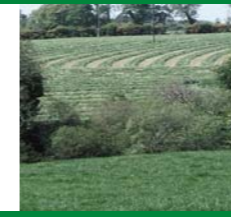

**AberMagic:** highly digestible grass variety with excellent grazing and silage yields.

**Clanrye:** New late diploid, good ground cover and DMD.

**Pelleted Clover blend:** contains a blend of large and medium leaved clovers, very suitable for grazing and silage.

**Homeland Yielder**

- 3.0kgs Kintyre
- 4.0kgs Tyrella
- 4.0kgs Drumbo
- 0.5kgs Pelleted Clover blend

11.50 kgs

**KEY FEATURES:**

- Formulated to deliver a highly versatile long term ley capable of producing excellent grazing and/or conservation.
- Gives a very early high quality forage of High-D value.
- Excellent sward utilisation with maximum 'Graze-out'.

**Contains varieties:**

**Kintyre:** extremely high yielding grass variety with excellent palatability.

**Tyrella:** highest spring growth in its class, 13% greater than control varieties on the IRL.

**Drumbo:** exceptional spring growth and digestibility, second highest in its class.

**Pelleted Clover blend:** contains a blend of large and medium leaved clovers, very suitable for grazing.

**Homeland High Clover**

- 4.0kgs Navan
- 2.5kgs Drumbo
- 3.0kgs Tyrella
- 2.0kgs Pelleted Clover blend

11.50 kgs

**KEY FEATURES:**

- Designed to produce a dense persistent sward which will last for many years.
- Even in a dry summer this mixture will continue to produce high quality forage.
- This blend of grasses and clovers thrives with lower inputs of artificial fertiliser.

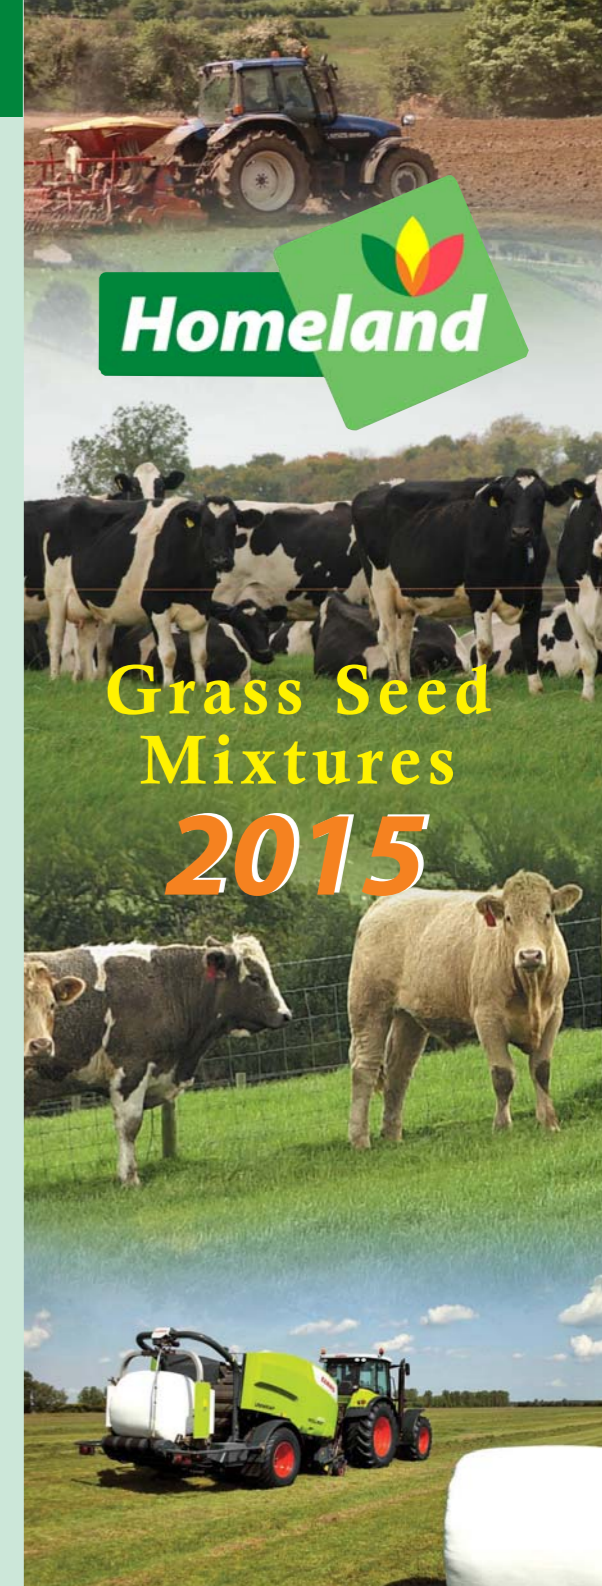

**Contains varieties:**

**Navan:** Excellent variety on the PPI list.

**Drumbo:** exceptional spring growth and digestibility, second highest in its class.

**Tyrella:** highest spring growth in its class, 13% greater than control varieties on the IRL.

**Pelleted Clover blend:** contains a blend of large and medium leaved clovers, both very suitable for grazing.

**Grass Seed Mixtures 2015**
