sticker remover

300 ml e

also for tar and
heel marks

HG sticker remover

- also for tar and heel marks

Removes stickers, sticker glue, sellotape, tar, oil, scuff marks and many other problems from most surfaces.

Directions for use: HG sticker remover is used undiluted.

Paper stickers: Apply HG sticker remover with a brush and repeat a couple of times. Leave to work and then remove the sticker. Finally apply the liquid once more and after a few seconds, remove the remaining glue with a cloth.

P.V.C.-stickers: Lift up an edge and let the liquid run behind. Lift up more of the sticker and reapply the liquid as necessary until it is possible to peel it away completely. Finally apply the liquid once more and after a few seconds, remove the remaining glue with a cloth.

Attention: Transport and store the bottle upright. Test the resistance of the surface prior to use, for instance with delicate high gloss paint, plastics etc. Not suitable for hard, transparent plastic material (polycarbonate). We advise against washing the used cloth in the washing machine.
