

# NOVOSPRAY

INNOVATIVE READY TO USE LACTIC ACID & CHLORHEXIDINE BASED PRODUCT FOR POST MILKING TEAT DISINFECTION

- Carefully designed blend of film forming polymers capable of application via spraying devices.
- Combines ease of application with the skin conditioning advantages of a barrier product.
- Optimised levels of complementary acting biocides for both short acting and long lasting protection.
- Enhanced levels of emollients and skin conditioning agents to help maintain and improve teat condition.

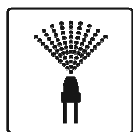

## RECOMMENDED USAGE

Ready to use teat spray. For post milking hygiene.

### TEAT SPRAYING

Rinse pipes thoroughly with clean water between different products.  
The product should be used directly from the container without dilution.  
Spray the full length of each teat after milking.  
Apply immediately after each milking.  
Wash and dry udders and teats before the next milking.

### POST-MILKING TEAT IMMERSION

The product should be used direct from the container without dilution.  
Fill a teat cup two thirds full with the product.  
Immediately after each cow has been milked, dip each teat in the solution ensuring that the entire surface of the teat comes in contact with the solution.  
Refill the cup as necessary.  
Teat cups should be emptied after milking and washed before reuse.

**Storage:** Store in a dry well ventilated area away from sources of heat or ignition

**Pack Size:** 25, 200 & 1000 litre

**Shelf Life:** 2 years from date of manufacture

USE BIOCIDES SAFELY. ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE. FOR HEALTH & SAFETY INFORMATION, REFER TO THE SAFETY DATA SHEET
