The science of animal nutrition

“NUTRIAS LACTATING EWE TICKS ALL THE BOXES”

“I rely on good management coupled with good nutrition to achieve maximum productivity from my farming system. The Nutrias Lactating Ewe is a fantastic product that has helped me realise my flock’s performance and capitalise on prolific breeding, for me it ticks all the boxes. I’m maximising the flock’s potential through the best nutrition available to complement my farming system along with the advice of my local FCS and support from my local Homeland stores in Achonry and Ballymote.”

– *Seán Conway, Lavagh, Ballymote*

Darragh Halligan, Homeland Achonry; Kerrie Smyth, Farm Commercial Specialist, Nutrias Feeds; and Seán Conway

CONWAY’S FARM

Seán runs a mixed enterprise of sheep and dry stock in Ballymote, Co Sligo. He has a mid-season lambing system comprising approx 200 Belclare crossbred breeding ewes, hoggets and ewe lambs. Seán uses predominantly terminal sires across the flock to produce progeny that goes from farm to factory. Previously, Seán bred replacement by crossing his ewes to a Texel ram but is now using a Suffolk to get a more all-round mother. This year, his flock scanned over 2 lambs per ewe mated and Seán has housed the ewes for the last 6 weeks to plan for spring grass when lambs hit the ground, around March 10th.

Benji monitoring pre-lambing nutrition

NUTRIAS LACTATING EWE provides the perfect energy and protein balance from highly digestible sources to supplement prolific ewes pre and post-lambing. Soya bean based, this supplement drives lamb birth weight, colostrum production and enables ewes to peak higher in milk yield. Quality ingredients are complemented with an excellent mineral pack to feed both the ewe and her lambs for an exceptional performance in a non-limiting environment – maximising livestock potential from nutrition.
